Teatro

Evolved tea server

GOOD DESIGN AWARD
2020

One that creates a space where people gather and smiles are born

"TEATRO" is a lower water supply type water server and tea dispenser function, and intuition with a touch panel. It will be Japan's first tea server machine that integrates various operations into one.

By adopting a type touch panel, our efforts to design that match the working environment have been highly evaluated. This product will be available to offices nationwide from this fall in line with the announcement of the award.

Teatro Features

14 types of tea and variety drinks

A large 10.1-inch touch panel

Produce corporate commercials on the touch panel

Lower water supply function

19ℓ water leak prevention tank

Automatic rinse function that reduces the maintenance burden on the user to keep hygienically used

Teatro Specifications
